

2014 Environmental Ratings of public companies in Korea

Korea Corporate Governance Service(KCGS) announced 2014 ESG ratings for public companies in Korea on Aug 13. With the ESG ratings, investors may figure out the level of ESG risks that companies face and use them in making investment decision. KCGS provides four ratings for each company which consist of Environmental, Social, Governance and Integrated rating.

ESG ratings by KCGS are graded into seven levels: S, A+, A, B+, B, C, D. 'S' rating means that a company has all the system and practices that the code of best practices requires and there hardly exists a possibility of damaging shareholder value due to ESG risks. 'D' rating means that there is a high possibility of damaging shareholder value due to ESG risks.
